

Get Started, Grow & Succeed

Talentscout Basic gives startup recruitment firms an affordable solution to help them make the most of their resume database and take their first step to success.

You have just started. You want to grow manifold over the next few years. What you need is an affordable solution that will help you leverage your biggest asset – your resume database.

Not a complex software with the bells and whistles, but a basic solution to serve your current needs that can be extended to add more functionality as you grow.

Talentscout Basic helps you

Create Your Own Database

Talentscout helps you setup a common database so that your recruiters can search for the right candidates quickly and accurately. Resumes sourced by one recruiter are available to all others to ensure larger number of closures.

Increase Recruiter Productivity

Help your recruiters talk to more candidates. Reduce time spent by them on mundane tasks by providing them productivity tools such as automated to do lists, mail reminders, resume parser and more.

Add Users without Paying Extra

Talentscout is licensed per server. You need not spend on additional licenses when your organization grows and number of recruiters increase.

Expand the software as you grow

Keep adding modules to the existing software as and when you need them. Needless to make a huge investment right now when you do not need most of the features of a full-fledged software.

We are too small a team for extensive recruitment software. Talentscout Basic provided us the required workflow and good parsing. We can now achieve more with lesser efforts.

Anishya Madaan,
Owner, Stam Consultants

Talentscout Basic is a simple software with a powerful search engine that helps us get relevant candidates and that is all we needed!

Bhalchandra Joshi,
Director, Manav Corporate Consultants

Software interface
