Centralized Database

Access Talentscout’s database from anywhere. Talentscout is a web -based application, which can be accessed by team members from other location.

Advance Permissions

Have the flexibility to give a single person multiple roles e.g. a supervisor for some positions, and recruiter for others. Restrict people's ability to view candidate information as per your organization's hierarchy and roles.

Advance Search

Find relevant candidates quickly and accurately with Talentscout’s powerful yet easy-to-use search engine. Search through candidate profiles with keywords and filters based on skills, actual years of experience, location and more. You can also search candidates by requirements.

Manage Clients

Define client acquisition workflow to manage clients and bag more deals with lesser resources and less time.

Advance Import

Leverage your database by importing resume from various sources like excel sheets, Desktop, Outlook, job portals and career site by using advanced sourcing tools. You can import resumes in bulk or one at a time.

Configure as per your requirements

Define workflow that you follow. Create custom fields and define screen configuration to capture required candidate information.

Candidate Management

Use candidate interaction history, mass mail, notes, one-click shortlist to select and submit right candidates faster. This also enhances the overall recruitment experience of a candidate.

Outlook Integration

Use Outlook Integration to send mails, reminders, updates and submit candidates to your clients directly from Talentscout without having to go to your MS Outlook account.

Advance Reports

View and analyze your performance with customizable reports. See the data you want in a format of your choice – excel, pdf or html.

100% Satisfaction Guarantee

If you are not satisfied with Talentscout uninstall and return the product to us within 30 days of its installation. We will immediately refund you the entire amount paid to us – no questions asked.
